To be read with Preliminaries/General conditions.

TYPE(S) OF SYSTEM/EQUIPMENT

L10/45 ROOFLIGHT COVERS

Location: **Insert here**

Manufacturer and reference: Latchways Fall Protection plc, Hopton Park, Devizes, Wiltshire, SN10 2JP

- Ref: L10/45 Walksafe® Roof-light cover/protector System.

 - System to be CE marked and hold EC Declarations of Conformity.

 - **Walksafe® Roof-Light Covers**
Latchways manufacture Walksafe Roof-Light Covers designed to prevent the potential for falling through roof-lights when access across a non-fragile roof is required within 2 metres of the roof light.
- The Walksafe Roof-Light Covers are manufactured from PVC-U planks bolted to a 50mm chambered bearer.
 - Walksafe Roof-Light Covers can be supplied to fit any type of roof light.
 - The covers can be unclipped when a roof light requires cleaning.
 - The covers are designed to allow the bearers to span across a minimum of two purlins and are tested on the assumption that the roof light will not absorb any of the loads during a fall.
 - The covers must be designed to cover the roof light plus a minimum of 300mm overhang on each edge.
 - Consult Latchways Plc. for technical literature or details. Latchways Plc. can also provide a design and specification advisory on the most appropriate walkway solution for each specific application and it is recommended that they are consulted early in the design process.

Other requirements: **Rooflight cover / protector.**
