

# *To find out if your fall protection meets the ANSI standard you could ask a few simple questions . . .*

Do you perform internal quality audits? ■ Are your external laboratories accredited and by whom? ■ What level of receiving inspection do you perform? ■ Do you have a Quality Manual? ■ Do you use standard operating procedures? ■ What statistical techniques do you use in manufacturing? ■ How often are the samples taken? ■ Do the production personnel have the authority to stop the line? How do you control your designs? ■ Do you have supplier management program? ■ Do you maintain a calibration system for your test and inspection equipment? ■ To what standards are your calibrations traceable? ■ Do you maintain a system for the identification, documentation, segregation, evaluation and disposition of non-conforming product? ■ Do you maintain a system for product identification and traceability throughout the plant? ■ Is your measuring equipment traceable to NIST? ■ Do you perform design reviews? ■ Are your personnel properly trained? ■ How do you document your employee training? ■ How do you certify suppliers? ■ Do you perform first article testing? ■ Do you perform lot sample testing? ■ Do you have a Quality Policy? ■ Do you have plans for continuous improvement? ■ Is inspection and test status clearly defined? ■ How do you control production? ■ Do you audit your vendors? ■ Do you have a mechanism for initiating corrective actions? ■ What standards is your test equipment calibrated to? ■ Do you track customer complaints? ■ Do you have a plan for the recall of non-conforming material? ■ Do you have a qualified "Material Review Board"? ■ Who does your Quality Manager report to? ■ Do you have a system in place for reporting non-conformances by production employees? ■ Do you have an organization chart? ■ Do you have a financial vehicle to measure quality? ■ Do you have a Total Quality program? ■ How do you measure customer satisfaction? ■

## *Or, you can just ask one . . .*

# Is it SEI Certified?

[Now you can have the same level of confidence in your Fall Protection as you have with other Personal Protective Equipment.]

# Continuing its commitment to quality - MSA Fall Protection announces . . .

## SEI CERTIFICATION OF THE FOLLOWING PRODUCTS.

### Harnesses\* - Pullover™

Pullover Harness P/N 502733 	Part No. 502717	502744
	502720	502745
	502733	502800
	502734	502822
	502736	502824
	502737	502826
	502740	
	502741	
	502742	

### - Vesttype™

Vestype Harness P/N 502771 	Part No. 502753
	502757
	502765

	502771
	502790
	502791
	502843
	502847

\* Harnesses listed here are STD size. All available sizes (XSM, XLG, & SXL) are SEI Certified.

Now that Fall Protection Equipment is available with third party certification, why use anything less?

Our commitment to third party certification is ongoing. MSA is continually submitting products for certification. For more information on the program and a current list of certified products visit our web site at [www.MSAnet.com](http://www.MSAnet.com)

### - FP Pro™ Cross-Chest & Vest Style

Part No. 415842	415947
415944	415950

FP Pro Cross-Chest  
Harness  
P/N 415944

FP Pro Vest Style  
Harness  
P/N 415950

### - Thermatek™

Part No. 10020062

Thermatek  
Harness  
P/N 10020062

### Shock Absorbing Lanyard - Dyna-Brake
