

TechnaCurv™ Full Body Harness Features & Benefits

FEATURE	BENEFIT
Curvilinear Comfort System	Provides total comfort to the user.
Curvilinear Torso Webbing	This patent-pending process curves the webbing around the neck area to help prevent chafing and discomfort on the neck that can be caused by some standard harnesses.
Variable Width Webbing	Distributes weight over a wider surface area to increase comfort during positioning (webbing varies from 1-5/8" to 2-5/8")
Teflon® Fabric Protected Webbing	Provides water, oil, grease, and dirt resistance to increase the life of the product.
Adjustable Y Back D-Locator Pad	<ul style="list-style-type: none"> • Allows complete adjustment of the back D-ring to provide proper harness fit. • Assists in moving the shoulder webbing away from the neck, providing additional comfort to the user. • Ribbed web slots in back pad allow for easy back D Ring adjustment. • A special polymer blend allows for optimal strength and minimal weight, giving you a lighter harness.
Secure-Fit Buckle	<ul style="list-style-type: none"> • Single hand operation. • Buckle release tabs move in opposite directions and are recessed inside the outer buckle dimensions to prevent accidental disengagement. • Positive engagement windows allow you to see that the buckle is properly engaged. No need to try and listen for a "click" on a noisy job site.
Visco-Elastic Shoulder Padding	<ul style="list-style-type: none"> • More comfortable than traditional foam padding, Visco-Elastic padding was initially developed by NASA. • Will not break down over time, offering superior comfort throughout the life of the harness. • Automatically adjusts to every curve of your body. • Compression molding process allows for the incorporation of comfort ridges. These comfort ridges provide more air circulation around the padding to keep you cooler.
