FOR IMMEDIATE RELEASE

MSA's low-profile Cairns® Rescue 360R is right for rescue

Pittsburgh, Pa., April 2006 — The new Rescue 360R rescue helmet from Cairns® is the lightest rescue helmet with the lowest profile, making it perfect for vehicle extrication, confined space rescue, and other rescue situations.

The thermoplastic shell with Cairns-exclusive thermal impact cap provides all-day comfort with the protection required for NFPA certification for both structural firefighting and urban search and rescue.
