

Comfo-Cap® Protective Headwear

Designed for use with
Miner's Lamp

- ➔ Mining industry applications
- ➔ Low-crown clearance for work in low-ceiling areas
- ➔ Equipped with lamp bracket and cord holder to support miner's lamp
- ➔ Molded cross ridges on crown for increased strength and rigidity
- ➔ Cap's peak helps to protect against small falling objects
- ➔ Provides top impact protection

The Comfo-Cap Protective Cap is widely used in the mining industry for head protection. The cap has a low-crown clearance for work in low-ceiling areas and is equipped with a lamp bracket and cordholder to support a miner's lamp.

Made of lightweight, tough polycarbonate plastic, the shell helps resist top impacts. Molded cross ridges on the crown provide increased strength and rigidity. The cap's peak helps protect the wearer's eyes and face from small falling objects.

The Comfo Cap is not specifically designed to protect against lateral blows from the front, side or rear. MSA's lateral protective helmets are so designed and must be used if lateral protection is desired. For more information, contact your MSA distributor.

Approvals

Comfo-Cap Protective Headwear meets or exceeds all applicable requirements for a Type I (top impact) helmet as outlined in ANSI Z89.1-2003, Class G (electrical, low voltage).

Note: If top and lateral head protection is desired, one of MSA's lateral protection helmets must be used.

Ordering Information

Comfo-Cap Protective Headwear

Color	Suspension	Part No.
White	Staz-On®	91522
Blue	Staz-On	91586
