*FOR IMMEDIATE RELEASE*

## **MSA CW Sentry™ Gas Monitor Provides 24/7 Chemical Agent Detection**

PITTSBURGH, April 2006 — The MSA CW Sentry Gas Monitor provides rapid detection of Chemical Warfare Agents (CWAs) and selected Toxic Industrial Chemicals (TICs). Using surface acoustic wave (SAW) sensing technology with a thermally modulated sample collector, the system avoids false positives for highly reliable operation in complex environmental conditions. Analysis data can be reported via RS232, ethernet, fiber optic, or switch closures.
