

Performance. Flexibility. Durability.

Passive Shutdown System

[MSA brings 75 years of gas detection to the trucking industry and is pleased to offer a reliable, safe solution for cargo tank passive shutdown]

- Meets U.S. DOT HM 225A requirements
- Utilizes gas detection to trigger valve shutdown in the event of hose separation
- Detects for propane, anhydrous ammonia and dimethyl ether
- Fail safe on loss of power and brake engagement
- Rugged, stainless steel design
- User-friendly operating LEDs and display
- Simple to install
- Satisfies new NFPA 58 passive shutdown requirements for bulk tank farms
