*FOR IMMEDIATE RELEASE*

### ***Trigard™ Monitoring System moves to standard factory production***

Pittsburgh, Pa., January 2009 — As of February 2, 2009, the Trigard Monitoring System will move from custom products to standard factory production. This change will be reflected in an updated product bulletin, installation outline drawing, quick start-up guide, and operation manual. The Trigard System monitors for chlorine, sulfur dioxide, additional toxic gases, combustible gases, and oxygen deficiency or enrichment. The Trigard System offers affordable monitoring solutions for water and wastewater facilities as well as for many other applications.
