

Now, The **Ultimate** Gas Monitoring System Is As Close As Your Desktop.

The Ultima® Gas Monitoring System provides the Ultimate in power and flexibility. When your gas detection application calls for combustible gas, toxic gas, or oxygen monitoring, there's no need to search any further.

Ultima Monitor features such as low-power, 2-wire intrinsically safe operation, plug-in sensors, and error-free automatic calibration end the search.

The Ultima Monitor:

- displays much more than just gas concentrations
- never needs any internal adjustments
- and is so smart it even alerts you when to change the sensor.

A complete line of accessories (too numerous to mention here) are available for ease of installation and operation.

If you're searching for the answer to your gas monitoring needs, there's no need to go any further than your desktop. Take the **Ultimate** Tour of the Ultima Gas Monitor on the internet at:
