

Introducing

The Ultima[®] *Plus* Digital Network System

[The ultimate gas monitoring system]

We took the Ultima family of products and combined it with the latest digital communication technology to create the Ultima *Plus* Digital Network System.

This state-of-the-art, high-performance gas detection system offers:

- Peer-to-peer communication
- Remote viewing of every Ultima *Plus* Gas Monitor with the Ultima *Plus* Display Module
- Relay contacts anywhere along the network with the Ultima *Plus* Relay Module
- Elimination of a central supervisory controller or computer
- Reduced wiring and installation costs
- Unlimited number of system configurations and layouts
