*FOR IMMEDIATE RELEASE*

## ***Chillgard<sup>®</sup> LE Refrigerant Monitor now with improved optics***

Pittsburgh, Pa., June 2008— **Chillgard LE Monitors**, part of MSA's Chillgard Series, now offer micro-machined component technology for consistency, repeatability, optimal reliability, and two-year warranty. Chillgard LE Monitors provide fast, reliable detection for low level leaks of refrigerants. Standard 4-20mA analog output can be connected directly to any existing building automation system or other controller. Relay contacts can be used to turn on fans or other ventilation and signaling devices. Additional features include integral display, status LEDs, and optional strobe.
