FOR IMMEDIATE RELEASE

MSA's ModCon™ 75 Controller Offers Economical System Management

PITTSBURGH, May 2006 — The ModCon 75 Controller is a pre-programmed PLC designed to work specifically with the Ultima X Gas Monitor with X³ Technology. This self-configuring and compact device controls and displays up to 25 Ultima X³ Gas Monitors. This controller offers ModBUS RTU output and an optional Ethernet interface. The MSA ModCon 75 Controller is the only unit on the market that provides ModBUS communication, 75 sensors per trunk and 10 dry-contact relays.
