*FOR IMMEDIATE RELEASE*

## ***GasGard<sup>®</sup> XL Controller offers reliability and versatility***

Pittsburgh, Pa., October 2008—MSA's new **GasGard XL Controller** is a multi-channel wall-mounted unit for monitoring toxic and combustible gases, and oxygen deficiency. Versatile and easy to use, the GasGard XL Controller provides protection from potentially hazardous conditions in a variety of industrial, chemical, municipal, and waste water applications. The GasGard XL Controller can be easily configured to accept up to eight remote gas sensors and offers reliability in a compact, durable housing constructed of fire-retardant ABS plastic.
