

Extreme Design . . . Ultimate Features

[The Ultima® X Series: The Next Generation of Gas-Detection Instruments]

MSA's new Ultima X Series Gas Monitors, for the detection of oxygen, combustible and toxic gases, feature:

- Sensor disconnect-under-power without declassifying a hazardous area
- Interchangeable smart sensors; no reconfiguration required
- Advanced LCD display; detailed, scrolling messages
- Alternating display for sensor reading and gas type
- One circuit board; increased reliability and easier serviceability
- Optional relay contacts for Fault and three levels of Alarm

With the Ultima X Series Monitors, you are assured of the latest sensing technology from an industry leader with more than 85 years of experience. And soon, even more options will be available in the Ultima X Series Monitors.
