FOR IMMEDIATE RELEASE

MSA's New Model R Calibration Gas Cylinders Offer 42% More at No Charge

Pittsburgh, Pa., January 2011 - MSA's new Model R Calibration Cylinders provide customers with additional eight liters of calibration gas or 42% more gas content per cylinder than the current 19 liters with no price increase. New cylinder bottles are red in color instead of the current blue.

New cylinders will contain a fill level of 27 liters total with the exception of P/N 460345 (butane, carbon dioxide mix) which remains at 16 liters per DOT regulations for flammable gas cylinders.
