For Immediate Release

MSA Introduces Coiled Probe for Orion® G Multigas and Leak Detector

The Orion G Multigas and Leak Detector from the MSA Instrument Division is now available with a coiled probe. With its ability to expand as needed, the coiled probe provides increased flexibility and ease of use.

MSA's Orion G Multigas and Leak Detector is a four-gas, multi-function portable detector featuring one-button calibration, rugged construction with excellent resistance to dust and water penetration and advanced ergonomic design. The instrument detects combustible gas leaks and O₂, H₂S and CO. The flexible coiled probe sensor makes it ideal for gas-leak detection at gas meters, bar holes, furnaces, pipes, storage tanks and survey sites. Other applications include confined space monitoring and carbon monoxide detection at flues and furnaces.

Simple, intuitive two-button operation allows for easy use with gloved hands and a large display with great contrast makes it easy to read, even in low-light conditions. With its highly durable construction, the Orion G Multigas and Leak Detector stands up to tough environments.

(more)

Other key features of the Orion G Multigas and Leak Detector include:

- Multi-functional flexibility: indoor, outdoor and underground—perfect for appliances, flues and underground pipes
- Bar-hole probe filter designed to keep out water and dirt
- Intrinsically safe leak sensor
- Ergonomic design that fits snugly in hand
- Long-life NiMH or alkaline batteries (interchangeable)
- Large display, with great contrast for quick, easy readings
- Fast response time
- Internal pump, for convenient remote sampling
- Sensors that are easy to change

The Orion G Multigas and Leak Detector is a product of MSA's Instrument Division. Headquartered in Pittsburgh Pa., MSA is dedicated to the innovative design, engineering, and manufacture of gas detection and monitoring instruments and sensors.
