FOR IMMEDIATE RELEASE

MSA's ORION^{®plus} Detector Offers Variety of Advanced Features

Pittsburgh, Pa., November 2006 —The MSA ORION^{plus} Detector combines the exceptional features of the ORION[®] Multigas Detector with a range of infrared (IR) and toxic sensor options. MSA's innovative IR sensor delivers stable readings in environments with challenging temperature and humidity effects. The detector offers standard datalogging, internal pump and rechargeable NiMH or disposable alkaline battery packs, plus easy one-hand operation and a compact, robust design.
