*FOR IMMEDIATE RELEASE*

## **MSA Galaxy® Automated Test System for Orion® plus Multigas Detector**

Pittsburgh, Pa., July 2007 – The Galaxy Automated Test System features tremendous versatility and ease of use, making it the perfect choice for managing your Orion plus Multigas Detector and other MSA gas detection equipment. It operates automatically, and requires minimal user training, as all gas tubing and electrical connections are pre-connected. This unit is a bump-tester, calibration station, and asset management system rolled into one.
