[Newer, Faster Responding with the Same Small Size, Small Price...Big Features, Big Value]

Actual Size

The Solaris FX Multigas Detector has an improved LEL sensor that has faster response and release times for toluene, xylene, and other aromatic hydrocarbons.

With these enhancements, the Solaris FX Detector is ideal for use in the chemical and petrochemical markets, where fast detection and clearing of aromatic hydrocarbons is crucial.

Included among the many features of the SOLARIS FX Multigas Detector are:

- Easy to use and maintain
- IP 65 rating provides superior protection against liquid and dust ingress
- 100+ dB alarm horn
- Vibrating alarm standard
- Optional powered pump probe available

- 2, 3, & 4 gas configurations available
- Patented MSA sensor technology inside
- Datalog option available
- 14+ hour run time
- 2-year all-inclusive warranty
- Another superior quality product from MSA

Contact MSA today to learn more about the low-cost, pocket-size Solaris FX Multigas Detector at 1-800-MSA-2222 or visit us at www.MSAnet.com.
