

Reliable. Easy to Use. Durable.

Accept Nothing Less Than STELLAR Performance

[MSA Blends High Performance and Affordability]

Whether you are looking for the best blend of features on the market or a low-cost maintenance-free gas monitor, the MSA STELLAR® Series of Gas Detection Instruments exceeds all your needs.

The FiveStar® Alarm presents a comprehensive combination of features and is the leader in the multigas detection market. The Orion® Multigas Detector has everything you want in a portable monitor for O₂, H₂S, CO and combustible gas.

The TITAN™ Combustible-Gas Detector combines innovative design and small size with high performance.

The PULSAR™ Single-Gas Detectors for O₂, H₂S and CO offer a market-leading list of features and maintenance-free, two-year service life at a very competitive price. Now, the PULSAR™+ Single-Gas Detector adds a gas-concentration display and replaceable sensor and battery.

Most of our monitors are compatible with MSA's TIM® (Total Instrument Manager) System. As the industry's leading computerized calibration system, the TIM System allows users to automatically calibrate their instruments, track calibration records, and print a computer-generated test receipt.
