

New Product Announcement

FOR IMMEDIATE RELEASE

MSA's SAW MiniCAD™ mk II Detector Offers Quick Identification of Trace Chemical Warfare Agents

Pittsburgh, Pa., April 2006 —The MSA SAW MiniCAD mk II Chemical Warfare Agent Detector uses proven surface acoustic wave sensing technology to simultaneously detect trace levels of nerve(G) and blister(H) agents. Highly selective to these agents and extremely resistant to false alarms, this lightweight personal detector has set a new standard for instrument ease of use and reliability
