Single-Gas Detector

# The PULSAR™ Single-Gas Detector

Everything You Want in a Portable, Maintenance-Free Instrument

- Maintenance-free, two-year service life
- No accessories needed for gas-response testing
- Reversible clip design for strong attachment to pocket (can be worn inside or out), belt or helmet
- Highly stable, stainless-steel, thin-profile patented MSA Button™ sensors
- Long-life lithium battery, 33% longer capacity than competition
- Large, easy-to-read, numeric end-of-service-life indicator, characters 4x larger than other displays
- Durable, designed to pass 6-ft. drop test
- Water and dust resistant, designed to pass IP54 rating
- Distinctive audio, visual and optional vibrating alarms
- Ultra-bright LED displays are on top of unit and visible from all angles
