*FOR IMMEDIATE RELEASE*

## **MSA Releases the SAFECONNECT™ Belt Bridge with the Sirius® Wireless Interface**

PITTSBURGH, April 2006 — The SAFECONNECT™ Belt Bridge works with the Sirius® Wireless Interface for integration into the MSA SAFESITE® Multi-Threat Detection System. These new system components allow users to communicate gas readings and other mission-critical information from an existing Sirius Multigas Detector back to the SAFESITE System for remote viewing within a wireless network.

Bluetooth technology and a powerful 900 MHz, spread spectrum, frequency-hopping radio, combine to enable rapid decision making.
