

MSA G1 SCBA Remote Quick-Fill® System

When Seconds Count!

WHEN ONE MINUTE IS TOO LONG...

Get the MSA G1 SCBA Remote-Mounted Quick-Fill System.

The only front-mounted NIOSH approved system for recharging cylinders.

The G1 SCBA Remote-Mounted Quick-Fill System recharges high- and low-pressure operating systems with the speed you demand in an emergency situation!

- Quick-connect design with rapid 40-second fills*
- Doffing of the air mask is not required
- Front-mounted design provides quick and easy access when seconds count
- Approved for use in IDLH atmospheres
- Optional 3-ft. emergency transfill hose in pouch accessory

* Average fill time varies based upon cylinder duration ratings and pressure. Most fills require 40 to 50 seconds. 60-minute rated cylinders may require up to 60 seconds.
