## Re: General Monitors Calibration Kit Ordering Changes

To simplify the ordering and stocking process for customers, the manner in which legacy General Monitors calibration kits are ordered is changing. Effective immediately, General Monitors calibration kits will be ordered as two individual items – the calibration hardware kit for the appropriate instrument and the calibration cylinder.

The calibration hardware kit will include the regulator, tubing and calibration adapter for the particular instrument. Following is a listing of the hardware kits.

Part Number	Description
1400272-1	Hardware Kit, Passive Catalytic Bead - Includes 922-023 Regulator, Tubing, Cal Cups
1400270-2	Hardware Kit, IR400/700 - Includes 922-022 Regulator, Tubing, 32554-1 Cal Cup
1400267-1	Hardware Kit, Passive MOS H2S - Includes 922-023 Regulator, Tubing, Cal Cup
1400268-1	Hardware Kit, TS4000H - Includes 922-023 Regulator, Tubing, Cal Cup. Used with NH3, NO, and SO2 Sensors
1400269-1	Hardware Kit, TS4000H - Includes 922-022 Regulator, Tubing, Cal Cup. Used with CL2, HCL, NO2, and ETO Sensors

To procure a complete calibration kit, the above hardware kit must be accompanied by the appropriate calibration gas cylinder. Following is a listing of the General Monitors calibration gas cylinders for reference.
