FOR IMMEDIATE RELEASE

MSA releases ACH ARC direct-mount accessory rail connector

MSA's new ACH ARC direct-mount accessory rail adapter and picatinny adapter fits MICH[®], ACH, and TC 2000 Series Combat Helmets. This exclusive design is engineered for military, law enforcement and tactical use and is the only combat helmet accessory rail connector on the market, offering a platform for current and future combat helmet accessories. Tough, fiber reinforced rails bolt directly to the helmet, holding a slide-and-lock picatinny adapter for mounting of lights or other picatinny-compatible accessories. The ACH ARC provides combat operators with effective weight reduction and mobility.
