FOR IMMEDIATE RELEASE

MSA's new Workman® Personal Fall Limiter offers confidence, choices

Pittsburgh, Pa., — With its high-quality design and constant lock-up rate, you can be confident that MSA's Workman Personal Fall Limiter (PFL) will be there for you when you need it most. With a standard 400-pound maximum working capacity and the assemble-to-order (ATO) flexibility with line length options from 6' to 12', you can be sure to find the right Workman PFL for you.

ATO ordering flexibility allows you to order the exact options you want, and only the options you want. An optional field-replaceable lifeline will eliminate down time and reduce your cost of ownership. All Workman PFL's come standard with an integral swivel connector.

The Workman PFL meets ANSI A10.32 and all applicable OSHA requirements. Units with 36C style snaphooks and/or 1" steel carabiners meet ANSI Z359.1 as well. Select models are CSA certified.
