MSA (FP) Service

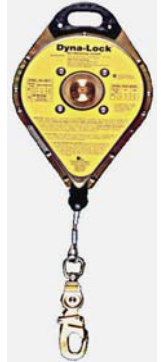

Annual Certification as per CSA Z259.2.2-98

In Canada all fall protection retractables need to be re-certified two (2) years after the date of manufacture and every year thereafter. This is a requirement under the CSA standard Z259.2.2-98.

MSA Canada Repair & Service Centres in Toronto and Edmonton now host state of the art equipment that allows a full Test Certificate to be issued when we inspect or repair and test your equipment.

Since January 1st 2007 MSA has incorporated a flat rate pricing program for FP services in order to make your order processing easier. This program has been a great success for both distributors and MSA. List prices are listed below. **MSA requires you to send a purchase order in with your equipment for the Inspect/Test fee.** This way your order will be processed without delay. If your equipment needs repair work MSA will advise you of any additional costs.

MSA Repair Center Turn-Around Time Reduced!

We are pleased to announce most repairs can be completed in **less than five** business days.

Any large repair orders consisting of 10 or more fall arrest blocks, please allow one to two weeks for repairs.

PRODUCT

INSPECT/TEST FEE (list)

STANDARD REPAIR (list)

Inspect/Test includes:

- Annual Inspection and Certification as per CSA Z259.2.2-98 for retractables
- Complete disassembly, inspection, clean, re-grease, reassembly, function test and drop test.
- MSA will provide the customer a certificate of conformance and a graph of the actual drop tests performed.
- The certificate and the graph will stay on file and easily accessible any time.

Standard Repair includes:

- Complete disassembly, inspection, clean, re-grease, reassembly, function test and drop test.
- MSA will provide the customer a certificate of conformance and a graph of the actual drop tests performed.
- The certificate and the graph will stay on file and easily accessible any time.
- Replace the cable assembly.
- Replace the labels as required.
- Replace any damaged internal parts the technician discovers.
- Any unit that has sustained a fall requires this service.

Note: Any equipment that indicates severe damages will be quoted on an individual basis. Severely damaged Equipment may include but not limited to damaged housings, seized cables and/or major signs of rust. MSA will quote the replacement cost with these types of repairs.

*****Products that are not listed above will be quoted on a time and material basis*****
