

MSA ICM® 2000 / 2000 Plus PASS Device Refurbishment Program

Effective through December 31, 2012 (U.S. and Canada)

MSA continues to drive firefighter safety with enhancements to ICM 2000 and ICM 2000 Plus PASS devices. A solid state accelerometer used to detect firefighter motion is now available as an MSA upgrade. Accelerometers are dual-axis electronic sensors that convert changes in momentum into voltage; these changes are interpreted as motion by the device's microprocessor. This technology provides a motion-sensing device that resists false alarms, with the durability to meet rigors that the fire service demands. Fire departments have a choice: MSA will 1) upgrade an existing device, or 2) a fire department can purchase a refurbished unit.

MSA has updated its ICM 2000/2000 Plus PASS Device Refurbishment Program. Choose from one of two ways listed below to update your ICM 2000/2000 Plus PASS Device.

1. To add the enhancement to your current ICM Unit, contact MSA Fire Customer Service. Your customer service representative will fax or email you a service notification form and address for your return. When you return the ICM 2000 or ICM 2000 Plus PASS Units, please enclose a copy of your service notification form and your purchase order. Your unit will be refurbished and returned to you within 20 working days. See pricing listed below.
2. Refurbished ICM 2000 or ICM 2000 Plus PASS Devices are available for purchase. Refurbished units have a two year parts and labor warranty on the accelerometer and 90 days parts and labor on all other ICM 2000 and ICM 2000 Plus Unit components. When you place your order by fax or phone, you will be charged full list price; see page two. When you return your old unit within 30 days, a \$175.00 (USD) credit for each ICM 2000 Unit and \$250.00 (USD) credit for each ICM 2000 Plus Unit will be issued. Credit will be issued only for the same model and quantity of units returned as were ordered. When returning your old unit (s), contact MSA Fire Customer Service for a return authorization form with the appropriate return number and address upon receipt of your order.

Description	List Price (USD)
ICM 2000 Unit	\$265.00
ICM 2000 Plus Unit	\$295.00

Please complete this form and submit with your purchase order to MSA Fire Customer Service (fax 1-877-672-3930) or email to fire.cs@msanet.com. fire.cs@msanet.com.

Order Form

Company name _____ Contact name _____

Phone _____ Fax _____

Address _____ PO Box Number _____

Unit description _____ Unit serial number _____

Please fill in number of units by part number requested.

Quantity*	** ICM Unit Model Number to be Returned	ICM Refurbished Kit	Model	Pressure	Thermal Alarm	List Price USD
	10022315	10037595	ICM 2000 Unit	4500	N	\$470.00
	10022314	10037596	ICM 2000 Unit	4500	Y	\$470.00
	10022313	10037597	ICM 2000 Unit	2216	N	\$470.00
	10022312	10037598	ICM 2000 Unit	2216	Y	\$470.00

**To locate this model number, look on the back of the unit. The model number is located on the top label.

Currently the four ICM 2000 Units listed here are the only models available at this time and quantities are limited. If other units become available, this information will be updated.

This program may be modified, changed or subject to price increase with 30-day written notice from MSA.
