**Re: MSA AirHawk II Air Mask Discontinuation**

Dear MSA Customer and Channel Partner,

By now, you received MSA’s announcement on the relaunch of our G1 Industrial SCBA platform, inclusive of several new features such as a Twin Cartridge APR Adapter, “fire-hardened” ATO configurations and the much-anticipated Remote Cylinder Connection (G1 iRC). In addition, AirHawk II upgrade kits, which allow the AirHawk II to be used with the G1 facepiece, remain available. All of this has been done to help easily transition existing AirHawk II fleet customers to the G1 Industrial and to introduce new customers to the successful G1 family of products. Learn more about the G1 Industrial SCBA [here](#).

With the above said, and following significant review, a decision has been made to discontinue the AirHawk II SCBA as of December 31, 2020. At that time, all AirHawk II part numbers and ATO configurations will be deactivated, except for a limited number of part numbers for customers who specifically require Heads Up Display (HUD) and/or Voice Communication options.

AirHawk II PNs for Discontinuation	G1 Industrial iRC Replacement Options

MSA recognizes the large number of AirHawk II units currently in service and we will continue to support these customers. As is standard with our respiratory product phaseout’s, AirHawk II replacement and maintenance parts will be made available for the next 10 years or until stock has been depleted, whichever occurs first.

If you have any questions or concerns, please contact MSA Customer Service at 1-800-672-2222.

Regards,

John Ramsey  
Product Line Manager, Respiratory Protection
