

MSA PARACLETE®

**MSA Paraclete® Releasable
Assault Vests**

The original, patented vest cut-away system!

MSA Paraclete designed the first ballistic vest to offer a patented, single-point release feature for instant vest removal. Others have tried to duplicate its simplicity, durability, and effectiveness but none have come close to MSA Paraclete's unique and life-saving system.

The MSA Paraclete Releasable Assault Vest (RAV) is a high mobility comfortable use vest designed for speed and stealth. When in use and fully loaded, these modular tactical vests are quickly removable with a single cut-away handle. This vest's capabilities greatly enhance the modern soldier's survivability while in training or combat environments.

The RAV vests' innovative design accommodates a full modular system of add-on pouches and accessories. Armor components are compliant with NIJ Standard-0101.04, 2005 interim requirements when worn with armor.

Key features:

- Patented single point release system.
- Internal front and back plate pockets
- Internal side plate pockets
- Works with MSA/Paraclete patented pouch attachment system
- Compatible with all MOLLE/PALS style pouches.
- Military specification materials
- Drag strap sewn full length of vest
- Hook-and-loop closure on internal armor plate pockets and soft armor accessories
- Zip-off back panel to easily change vest's back configuration
- Low-profile shoulder routing for wired communication channels and hydration tubing
- Ballistic performance exceeds OTV tactical vest fragmentation standards
- Warranty covers ballistic components workmanship for 5 years, outer shell and components for 18 months

Patent Information State of the art Vest Cut-Away System

- US Patent Number 6,769,137 for MSA Paraclete Armor & Equipment Vest Cut-Away System was granted on August 3, 2004.
- Unique system allows user to instantly and completely remove a fully-loaded tactical vest just by pulling a single low profile cut-away handle.
- Activation of cut-away system separates vest into five individual pieces; internal cummerbund, external cummerbund, front vest panel, back vest panel, and cutaway pillow.
- Once activated, vest can be quickly and easily reconfigured for wear.
- On a fully modular field serviceable system, if any portion of the cut-away system becomes unserviceable, only that individual component needs to be replaced; other systems on the market require ripping the vest apart at the seams or full replacement.

| Integral routing for communication cables and hydration

| Adjustable ballistic shoulders

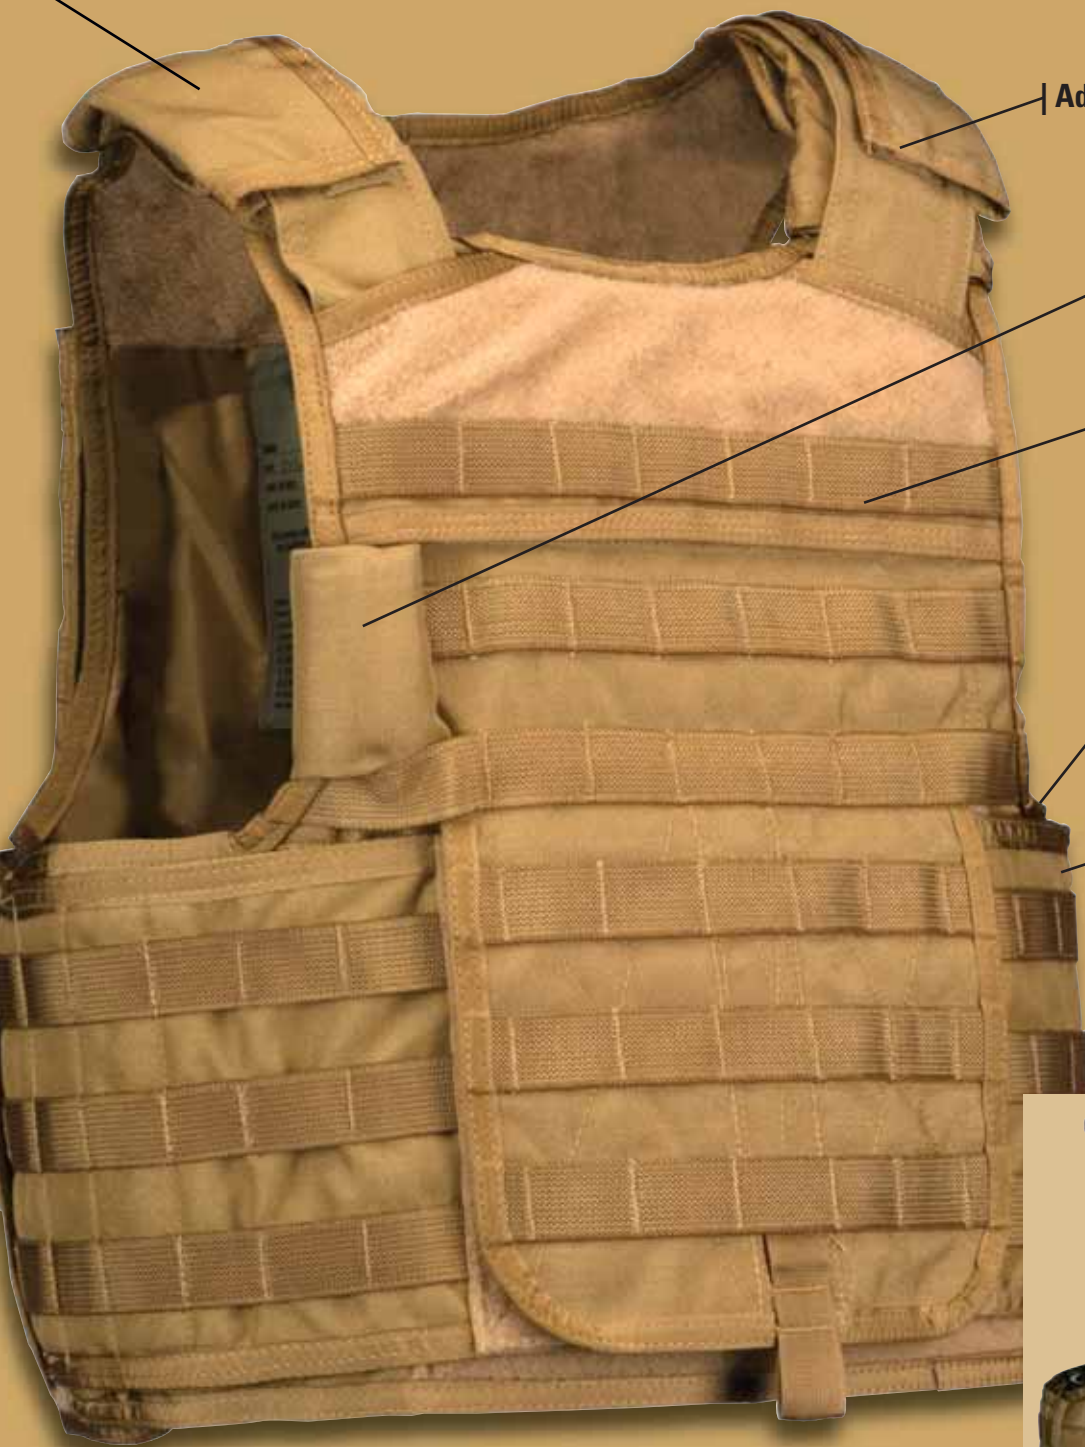

| Single point release

| Front and back plate pockets for up to 10 X 12 plates

| Adjustable side closure – no hardware

| Side hard-plate pockets

| Webbed modular grid MOLLE / PALS

| Removable ballistic collar

| Removable throat/front yoke

| Drag strap at loop

| Ballistic groin protection
